Application No.

Applicant(s)

Continuation of 5: Applicants requested the Examiner only consider the supplemental response filed 11/23/04. In this response, Applicants reiterated the previous argument concerning the withdrawn of claims 68-74, and indicating that they are petitioning the Examiner's decision. In response, it is noted that it is applicants who elected the particular fragment of SEQ ID NO: 2 without traverse in the response filed 7/7/03. In the same response, applicants canceled claims 26-31, which are similar or the same in scope as the later submitted claims 68-74. It is also noted that the claims are withdrawn only because they are drawn to non-elected species. Once the currently rejected generic claims are found allowable, a reasonable number of additional species would be considered as indicated in MPEP, "Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are writte in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a)".

Further, it is noted that MPEP also teaches "Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention".

Applicants did not present arguemnts to other rejections of record, thus for reasons of record, the rejections stand.
